DISCUSSION:

This site is an active RCRA permitted facility classified as a storage facility. The prime concern at this facility has always been the potential hazards to the public from the UXO and other explosive waste that is lying on the surface or near surface. The site is regulated and monitored under the State's RCRA Program. The permit includes RCRA site wide corrective action provisions to address the contamination associated with the site. Therefore, based on the file information, the site should keep a decision of "No Further Remedial Action Planned" (NFRAP) under Superfund in CERCLIS, and the site will be referred to the State.

Based upon currently available information, this site fails to meet the minimum criteria required to be included, or proposed, at this time on the NPL by the EPA. The NPL is EPA's list of sites that are priorities for further investigation and, if necessary, response action under CERCLA, 42 USC 960001 et seq. Other actions maybe appropriate under State Authorities.
